

Bison health in Wood Buffalo Natl. Park

Join us for a bison focused conversation with refreshments and a chance to win Amazon gift cards!

Where: SJ Family Center

When: November 8th, 5 - 8 pm

We are **University of Calgary** researchers, helping to address tuberculosis and brucellosis in bison by understanding how people think about the issue. Visit our project website at ucvm-bison-project.com or stop by the hall for a chat.

Topics at the Open House:

- where the diseases came from
- what management looked like in the past
- what is going on now
(a Parks Canada representative will be available to answer questions)

Hope to see you there!
